Professional Summary

Results-driven Software Developer specializing in ASP.NET, React, and TypeScript, with proven experience building and optimizing scalable web applications. Developed and delivered end-to-end systems, implementing robust CRUD operations and integrating SQL databases into high-performance, user-focused interfaces.

Led the development of a Clearance System at King Fahad Medical City, streamlining workflows and improving operational efficiency. Contributed to smart IoT-based platforms, enhancing automation and system intelligence. Proficient in HTML, CSS, JavaScript, C#, Python, and Java, with strong expertise in database design and modern UI/UX development, including interactive and 3D web experiences. Recognized for problem-solving, supporting IT operations, and collaborating effectively to deliver reliable, scalable, and impactful digital solutions.
