Software developer with a Computer Science diploma and hands-on experience delivering responsive web applications, role-based business systems, dashboards, and digital workflows. Proficient in React, TypeScript, ASP.NET, C#, and SQL, with additional experience in technical business development, digital sales, client needs analysis, and solution presentation.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Vite, Next.js, responsive UI/UX

Backend and Data: ASP.NET Web Forms, C#, SQL, MySQL, CRUD operations, REST API integration

Tools and Practices: Git, GitHub, requirements gathering, testing, debugging, dashboards, PDF/Excel reporting, CRM workflows

Business and Client-Facing: Technical business development, digital sales, lead research, client needs analysis, technical proposals, solution presentation, sales follow-up, email and WhatsApp outreach

PROFESSIONAL EXPERIENCE

IT and Web Systems and Business Development Specialist

Smartcat Company, Riyadh | December 2023 - August 2026

- Developed and maintained responsive corporate websites and product interfaces using React, TypeScript, HTML, and CSS.
- Translated client needs into technical requirements and coordinated website, CRM, and system improvements with internal teams.
- Researched prospects and target sectors, prepared technical proposals and solution presentations, and supported digital sales through tailored email and WhatsApp outreach.
- Managed client follow-up, remote IT operations, troubleshooting, documentation, and project delivery coordination to maintain service quality.

IT Support Technician - Tamheer Program

King Fahad Medical City, Riyadh | December 2025 - June 2026

- Developed and enhanced CRESENT, a role-based research and course evaluation portal, using ASP.NET Web Forms, C#, and SQL.
- Implemented workflows for staff, administrators, and external evaluators, covering course evaluations, Standardized Patient requests, approvals, returns, status tracking, and QR access.
- Built dashboards and PDF/Excel reports, improved electronic forms from user feedback, and resolved technical and usability issues.

Full-Stack Web Developer - Cooperative Training

King Fahad Medical City, Riyadh | January 2025 - May 2025

- Developed an electronic clearance and permit system using ASP.NET, C#, SQL, HTML, CSS, and JavaScript.
- Implemented end-to-end CRUD workflows, integrated data across modules, designed interfaces, tested system flows, and generated PDF/Excel reports.

SELECTED PROJECTS

- Roaahub IoT and Fleet Platform: Developed responsive React/TypeScript website and dashboard interfaces for fleet, equipment, cold-chain, palm, and energy services, prepared for Laravel API and MySQL integration.
- Email Campaign System: Designed a workflow for Excel contact imports, reusable templates, campaign scheduling, and delivery tracking.
- Additional Development: Built corporate and product websites plus Family Management web and Android applications.
